An undergraduate Informatics Student at Sepuluh Nopember Institute of Technology Surabaya who is enthusiastic about Cybersecurity and Network Infrastructure

Education

Sepuluh Nopember Institute of Technology - Surabaya

Aug 2024

Bachelor of Informatics Engineering, 3.71/4.00

- Active in the Schematics organization in the NLC division, Logic subdivision
- Becoming a teaching assistant for the Operating Systems course
- Active member of the Cyber Security Unit (UCS)
- Enthusiastic about learning Cybersecurity and Network Infrastructure
- Actively participates in Cybersecurity competitions, especially Capture The Flag (CTF)

Organizations and Experiences

Real-Time Order Tracking System Personal Project - Online

Jan 2026 - Mar 2026

Full Stack Developer

A Pizza Tracking System Website • Tech Stack: Go (Golang), Gin, GORM, SQLite, Server-Sent Events (SSE), Tailwind CSS, JavaScript

Designed and developed a full-stack web application to process and track orders in real time using Go and the Gin framework.

- Implemented Server-Sent Events (SSE) to deliver live, asynchronous status updates from the backend to the client, eliminating the need for continuous HTTP polling.
- Built a secure admin dashboard with custom session middleware, password hashing using bcrypt, and persistent session storage with GORM to manage application state.
- Designed a normalized relational database schema using GORM and SQLite, ensuring data integrity through custom struct-level form validation.
- Developed a dynamic server-rendered frontend using Go Templates and Tailwind CSS, minimizing client-side overhead while maintaining a modern user interface.
- Go & Gin Framework
- GORM & SQLite
- Authentication & Security
- The Real-Time Engine (SSE)

Flexoo Academic - Surabaya

Jan 2026 - Apr 2026

Backend Developer

Company Profile Website Project for HMTI

- Designed and developed a high-performance RESTful API using Golang (Gin Framework) and PostgreSQL database.
- Implemented Clean Architecture by separating Controller, Service, and Repository layers to ensure modular, maintainable, and scalable code.
- Built an integrated CRUD system for key modules, including News (with automatic slug generation), Events, and Achievements.
- Secured API endpoints using JSON Web Token (JWT)-based authentication and authorization with middleware.

- Configured a container-based development environment using Docker and Docker Compose for local database synchronization and live reloading (Air).
- Managed code collaboration and version control using Git/GitHub with a structured branching strategy and stacked pull request workflow.
- Golang Backend Development
- Dockerization
- CI/CD Automation

Lab Based Education Project at Net Centric Computing Laboratory - Surabaya

Oct 2025 - Nov 2025

DevOps

- Designed and implemented a cloud-based application architecture using Microsoft Azure services, including Virtual Machines (VM), Azure Functions, and PostgreSQL Flexible Server.
- Configured and managed an Nginx web server on Ubuntu Linux to host the frontend, and secured ports using Network Security Groups (NSG).
- Integrated a private network using VNet Integration to ensure secure communication between the backend, database, and VM.
- Implemented static file storage using Azure Blob Storage with connection string integration in the application.
- Applied fundamental network security concepts, including configuring inbound/outbound firewall rules and enabling private database access.
- Cloud-based Application Development

Unit Community Cyber - Surabaya

Sep 2025 - Present

The Cyber Security Unit (UCS) is a student activity unit (UKM) focused on cybersecurity at the Sepuluh Nopember Institute of Technology.

- Open-Source Intelligence (OSINT)
- Digital Forensic
- Cryptography

Schematics 2026 - Surabaya

Mar 2026 - Present

Head of Logic Subdivision

The Schematics National Logic Competition (NLC) is a competition designed to test problem-solving skills related to logic as well as in-depth analytical abilities. The Schematics NLC is intended for junior high school (SMP/MTs or equivalent) and senior high school (SMA/SMK/MA or equivalent) students across Indonesia. Participants in the Schematics NLC compete in teams consisting of up to three members from the same school.

- Logical Thinking
- Problem Solving
- Public Speaking
- Organization
- Leadership

Flexoo Community - Surabaya

Oct 2025 - Present

Member

Flexoo is a software house founded by HMTC ITS, built on the collaborative spirit of Informatics Engineering students. It serves as a one-stop platform for managing incoming projects, mainly focused on website development with both standard and customizable packages. Unlike typical software houses, Flexoo also offers shared handling services, allowing teams to access IT talent support when they lack resources—especially useful for students working on competitions or startups.

- Backend Development

Schematics 2025 - Surabaya

Mar 2025 - Dec 2025

Staff of Logic Subdivision

The Schematics National Logic Competition (NLC) is a competition designed to test problem-solving skills related to logic as well as in-depth analytical abilities. The Schematics NLC is intended for junior high school (SMP/MTs or equivalent) and senior high school (SMA/SMK/MA or equivalent) students across Indonesia. Participants in the Schematics NLC compete in teams consisting of up to three members from the same school.

Competitions

SRIFOTON Capture The Flag 2025 - Online

Sep 2025

Participant

CTF (Capture The Flag) is a hacking competition where participants are required to find hidden flags within a system.

- OSINT
- Digital Forensic
- Web Exploitation
- Cryptographic

Competitive Programming of COMPFEST 17 - Online

Aug 2025

Participant

The largest Informatics Engineering event in Indonesia featuring competitions, including competitive programming (CP).

- C
- C++

Competitive Programming of National Programming Contest (NPC) 2024 - Online

Sep 2024

Participant

The Schematics National Programming Contest (NPC) is one of the events in the Schematics series organized by the Computer-Informatics Engineering Student Association at the Sepuluh Nopember Institute of Technology Surabaya (HMTTC ITS).

- C
- C++

UI/UX Design Competition of RECURSION 1.0 2025 - Online

Mar 2025 - Apr 2025

Participant

RECURSION 1.0 is a national-level Informatics student innovation event organized by the Informatics Student Organization of the Faculty of Engineering at Hasanuddin University.

- UI/UX Designer
- Figma

Skills

- **Programming Skills:** C/C++, Python, Go, Java, HTML, CSS, JavaScript, Bash/Shell Scripting, PHP
- **Capture The Flag:** Open-Source Intelligence (OSINT), Digital Forensics, Web Exploitation, Cryptography

- **Interest:** Cyber Security, Cloud Computing, Formula One, Physics, playing game, watching movie, and listening to music
- **Soft Skills:** Public speaking, problem solving, and critical thinking
